

AMENDMENTS TO THE DRAWINGS

In the subject Office Action, the drawings were objected to under 37 CFR 1.83(a) because it was stated that the drawings did not show every feature of the invention specified in the claims. In particular, it was stated that the claimed motor must be shown.

Accordingly, Applicants have amended Figure 2 to show a motor connected to each pulley. The motor is delineated simply by a box because it is respectfully submitted that the motor is a conventional feature disclosed in the description and claims. No new matter was added with this amendment since the structure that has been added to the drawings represent structures which were already disclosed in the specification. See, for example, paragraph 0020.

Three drawings sheets are being submitted to replace the three previous replacement drawing sheets submitted on May 11, 2009. The drawing sheets are each labeled SUPPLEMENTAL REPLACEMENT SHEET.

Therefore, Applicants respectfully request reconsideration and withdrawal of the objections to the drawings.
